

RAPID EQUIPPING FORCE

United States Army

ENERGY TO THE EDGE

Global Deployments - Global Results

WHAT DO WE DO?

Equip – Provide tailored, modular, scalable energy technology packages, integrating generators, energy storage and renewable power generation systems

Insert – Identify and provide emerging operational energy solutions to forward units for operational assessment and feedback

Assess –

- ❖ Conduct local site assessments to identify the tactical problem. Wherever possible, REF will provide immediate results during the initial assessment phase by reconfiguring the unit's existing equipment and training Soldiers on best practices.
- ❖ Measure the performance and impact of REF solutions
- ❖ Share lessons learned with the broader Army and Operational Energy communities.

Mission: REF deploys teams of Operational Energy advisors globally to equip, insert and assess emerging technologies and techniques to improve power reliability, water production and recycling capabilities and waste reduction.
